Cracow, Poland   *www.coolpage.pl*

- designing software architecture
- developing PHP software
- developing JavaScript software
- reviewing & refactoring source code
- providing technical documentation
- providing technical support
- maintaining servers

Industry Knowledge:
Software Engineering, Test Driven Development, Behaviour Driven Development, Continuous Integration, Agile Methodologies, Scrum Methodologies, Lean Methodologies, Unified Modeling Language, Design Patterns, Web Services, High Availability, Scalability.

Programming Languages:
Python, Java, PHP, JavaScript, C++, C, Bash.

Platforms:
Arch Linux, Debian, CentOS, Android.

Frameworks:
Pyramid, Django, Tornado, Flask, Zend, OpenGL, jQuery.

Web Technologies:
HTML, XHTML, CSS.

Version Control Systems:
Git, Mercurial, Subversion.

SQL Databases:
PostgreSQL, MySQL, SQLite.

NoSQL Databases:
Redis, Elasticsearch, Neo4j, MongoDB, Memcached, Amazon DynamoDB.

Provisioning, Automation, Deployment & Operations:
Docker, Ansible, Fabric, Puppet, DevOps.

Cloud Computing:
Amazon Web Services, Google Cloud Platform, Kubernetes, MapReduce.

Education

Jagiellonian University *2011 - 2012*
Profile: Computer Science

AGH University of Science and Technology *2010 - 2011*
Profile: Computer Science

Languages

- **English** - professional working proficiency
- **Polish** - native proficiency

Awards   Finalist in Polish Olympiad in Informatics   *Sopot, 5th April 2008*
